Holistic Connections

This month takes a look at Animal Communication. We all have a close bond with our animal companions, and communicate with them everyday. I'm sure we've all felt times when we just "knew" what they were thinking and feeling. Below is more information about Kristin Thompson, a local animal communicator. I've had the privilege of working with Kristin in communicating with the animals in my life. I am always impressed by her accuracy, honesty, and most importantly her dedication and love for all animals. We are lucky to have such a talented communicator in our community, to learn more, read on!

Wishing health and happiness to you and yours!

Jennifer Stern

Community Spotlight

"The work that I do through private consultations and teaching people to understand animals as unique, whole spiritual beings, brings me a sense of completeness and greater purpose in my life. It is the best thing I do. I am happy to say that as a professional animal communicator, I am able to give back with love to the wonderful universe that supports us all. The goal of any consultation that I conduct is to facilitate more communication, love, harmony and understanding among all involved." – Kristin Thompson

Kristin Thompson's animal communication consultations offer a way to better understand your beloved animal companion. As an animal communicator, Kristin can help in understanding and working with your animal to resolve behavior issues. Communication can be very valuable during times of stress, illness, and death. Kristin's consultations can be done by telephone or in person. Before the consultation, the animal's name, breed, age, color and any special markings are required. Pictures are not necessary, but can be helpful. It is also suggested that you have in mind questions or topics you wish to cover during the session. To learn more, visit Kristin's website www.communicatewithanimals.com or contact her at 716-778-6233.

The above information is for educational purposes only, and does not take the place of veterinary medicine. You should consult your veterinarian with specific questions or for specific diagnosis of your animal's health.
